OUR STORY...

Founded in 1995 by Grammy Award-winning musician Richard Cooke, Freenotes Harmony Park™ was born from the desire to make music accessible to everyone. Inspired by his own journey of learning to play music instinctively, Cooke created outdoor instruments that break down barriers of time, cost, and talent. These beautifully crafted instruments invite people of all ages and abilities to experience the joy of making music effortlessly and instinctively.

Scan here to enjoy
Richard's TEDx talk.

The Power of **IMPROVISATION**

At Freenotes Harmony Park, our design philosophy centers around unlocking the full potential of musical instruments through the power of improvisation. Research has shown that improv goes well beyond music itself and influences **creativity, communication,** and **critical thinking.**

By intentionally crafting our instruments to eliminate the “wrong” notes and remove the barriers of traditional music design, we empower everyone—regardless of skill level—to experience the joy of spontaneous musical expression.

This approach fosters connection and creativity in communities, allowing people to explore and celebrate the boundless possibilities of music as a universal language.

For the CLASSROOM

Whether incorporating the Orff Schulwerk approach or another pedagogical method, music educators worldwide agree that improvisation is a crucial part of learning to play music. Improvisation teaches us to experience music deeply, allowing students to engage with sound in a way that encourages creativity, emotional expression, and independence. It activates the brain, enhancing cognitive functions and neural connections essential for intellectual, social, and physical development.

Our outdoor musical instruments are uniquely designed to support these educational goals by making musical expression accessible and enjoyable

for all students. By intentionally eliminating the possibility of playing “wrong” notes, our instruments produce only harmonious tones, creating a welcoming environment for exploration and creativity. This allows students to focus on the joy of making music rather than the fear of making mistakes, fostering a love for music that can last a lifetime.

Imagine a classroom that extends beyond four walls, where students can step outside, connect with nature, and engage in spontaneous musical exploration. Our instruments are not only durable and weather-resistant but also intuitively designed to produce beautiful sounds with minimal instruction. This makes them ideal for reinforcing classroom learning, enhancing sensory experiences, and encouraging collaborative play.

By integrating our outdoor musical instruments into your music education program, you provide students with the opportunity to explore musical concepts in a hands-on, experiential way. They learn to listen, respond, and create, developing skills that go far beyond the music room. From enhancing rhythmic understanding to fostering social interaction and boosting self-confidence, our instruments offer a holistic approach to music education that can transform how students experience and understand music.

THE SOUND OF *Quality*

Precision Hand-Cut BARS AND CHIMES

All bars and chimes are precisely and individually hand-cut to size to reach the appropriate tuning. They are then carefully deburred to remove any sharp edges or corners, and drilled at the nodes to maximize note sustain.

Strategic RESONATORS

Many of the instruments utilize a quarter-wave resonator, which requires a strategically placed plug within the resonator. This allows each note of the instrument to obtain a uniform and lasting tone.

Traditional CABLE LACING

Many Freenotes Harmony Park instruments utilize lacing cable to attach the bars or chimes to the instrument frame. This traditional process gives the notes flexibility and resilience to sustain in all kinds of weather and conditions.

Durable MALLET CABLES

We use a 1/4" coated cable for attaching our mallets to the instruments, offering maximum playability while maintaining a secure connection. Our cabling is composed of braided stainless steel wire with a durable outer PVC coating for unparalleled quality.

Meticulous QUALITY CONTROL STANDARDS

All instruments are completely assembled from start to finish in the same factory, allowing customer care, engineering, and production crews to work closely together and ensure a superior final product.

We Deliver OPTIMIZED, SUSTAINABLE & REUSABLE PACKAGING

Corrugated — We utilize 100% recycled corrugated material that is sustainably sourced and SFI certified.

Polyethylene Foam — Packaging designs utilize PE Foam made from 65% recycled content.

Reusable Packaging — The materials we use for packaging are reusable and designed with multi-impact PE material, delivering better product protection against repeated drops.

Zero Landfill Waste — We employ closed loop systems to promote packaging recovery and recycling with no loss of quality.

Harmonious COMMUNITIES

Our outdoor musical instruments are designed to bring people of all ages and backgrounds together, creating shared musical experiences that transcend language, culture, and social barriers.

By placing our instruments in parks, playgrounds, and public spaces, we provide communities with accessible, inclusive opportunities to engage with music. These spaces become vibrant gathering points where individuals can connect, collaborate, and express themselves creatively.

Music has the unique ability to resonate with the human spirit, evoking emotions and creating bonds that strengthen community ties. Our instruments harness this power, turning any outdoor area into a space where people can gather, communicate, and build meaningful relationships. Whether it's a child discovering the joy of sound for the first time, a group of friends improvising together, or neighbors coming together in a spontaneous jam session, our instruments help create moments of joy, connection, and understanding.

Harmony HIGHLIGHTS

Freenotes Harmony Park™ began with a mission to bring music to outdoor environments. Every instrument we make is handcrafted and expertly tuned to bring simple, harmonious joy to everyone who plays them. On the next few pages, you'll see examples where our musical instruments have transformed the environment and created joy. Music is a wonderful equalizer, bridging diverse cultures and backgrounds. Music can inspire. Music can heal. Music can bring people together.

HARMONY ENSURES *Fun for All*

PROJECT SPOTLIGHT:
GRAMMY MUSEUM MISSISSIPPI | CLEVELAND, MISSISSIPPI

The Mississippi Grammy Museum's outdoor musical instrument park, inspired by Cleveland's Sculpture Garden, offers a unique and engaging experience for visitors of all ages. Located on the museum's front lawn and accessible to everyone, the music park complements the surrounding sculptures and provides a hands-on way for people of all ages and abilities to explore music. Though newly established, the park has already begun attracting visitors, and the museum plans to incorporate it into educational programs, using the instruments as tools for interactive learning. This thoughtful addition enhances the museum's mission to inspire and educate through the power of music.

HARMONY PRIORITIZES *Inclusivity*

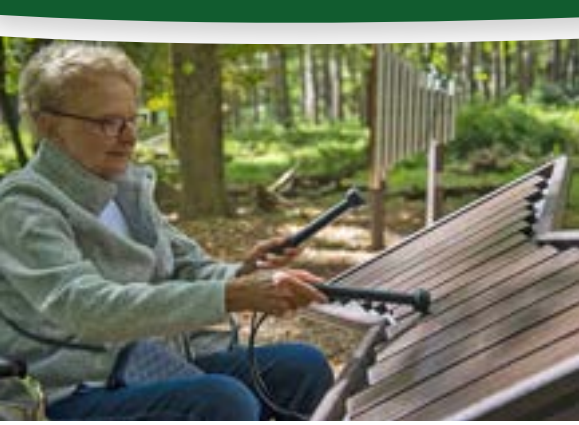

PROJECT SPOTLIGHT:
HARMONY PARK NAVARRE PROJECT | NAVARRE, FLORIDA

The Harmony Park Navarre project, led by Kimberly Sulger and the Navarre Rotary Club, transformed a waterfront area in Navarre, Florida, into an inclusive musical playground. Despite challenges like weather delays and the pandemic, the project thrived through strong community support and diverse funding. Now featuring ADA-compliant Freenotes Harmony Park instruments, the park fosters musical interaction among people of all abilities, creating a unique and engaging space that enriches the community.

HARMONY PAIRS WITH *Adventure*

PROJECT SPOTLIGHT:
AUTISM NATURE TRAIL (THE ANT)
AT LETCHWORTH STATE PARK | CASTLE, NEW YORK

The Music Circle at Letchworth State Park's Autism Nature Trail exemplifies the power of inclusive design and offers a harmonious experience for visitors with diverse sensory needs. By combining accessible musical instruments with thoughtfully designed areas for solitude, the Music Circle offers a supportive environment for all people. This project stands as a testament to the value of creating public spaces that are not only beautiful but also inclusive, ensuring that everyone can enjoy the healing and connecting power of nature.

HARMONY FOSTERS *Joy*

PROJECT SPOTLIGHT:
MORNING POINTE SENIOR LIVING | CHATTANOOGA, TENNESSEE

“Morning Pointe Senior Living partnered with Freenotes Harmony Park to create an outdoor musical instrument park within their Lantern Memory Care Community. This space offers a safe, accessible, and enriching environment for all residents, fostering joy, social interaction, and a strong sense of community. The park also serves as a venue for intergenerational events, enhancing connections between residents and the broader community.”

—Franklin Farrow, CEO and Co-founder,
Morning Pointe Senior Living

HARMONY IS *Hands On*

PROJECT SPOTLIGHT:
MIAMI CHILDREN'S MUSEUM | MIAMI, FLORIDA

The Miami Children's Museum brings creativity to the outdoors with its new interactive instrument park. Designed to be a space where kids and parents can make music together, this vibrant addition transforms the museum's exterior into a dynamic, hands-on experience. Perfect for sparking imagination and fostering connection, the park invites families to explore and play, turning every visit into an opportunity for shared discovery and fun.

HARMONY ENCOURAGES *Education*

PROJECT SPOTLIGHT:
THE BRIGHT SCHOOL | CHATTANOOGA, TENNESSEE

The Bright School enhances its music education program by incorporating portable outdoor musical instruments. With options designed for both toddler-height and standard-height use, these instruments ensure that all children can participate and enjoy making music. Perfect for integration into music classes, they provide a playful, hands-on experience that enriches learning, fosters creativity, and brings joy to every student.

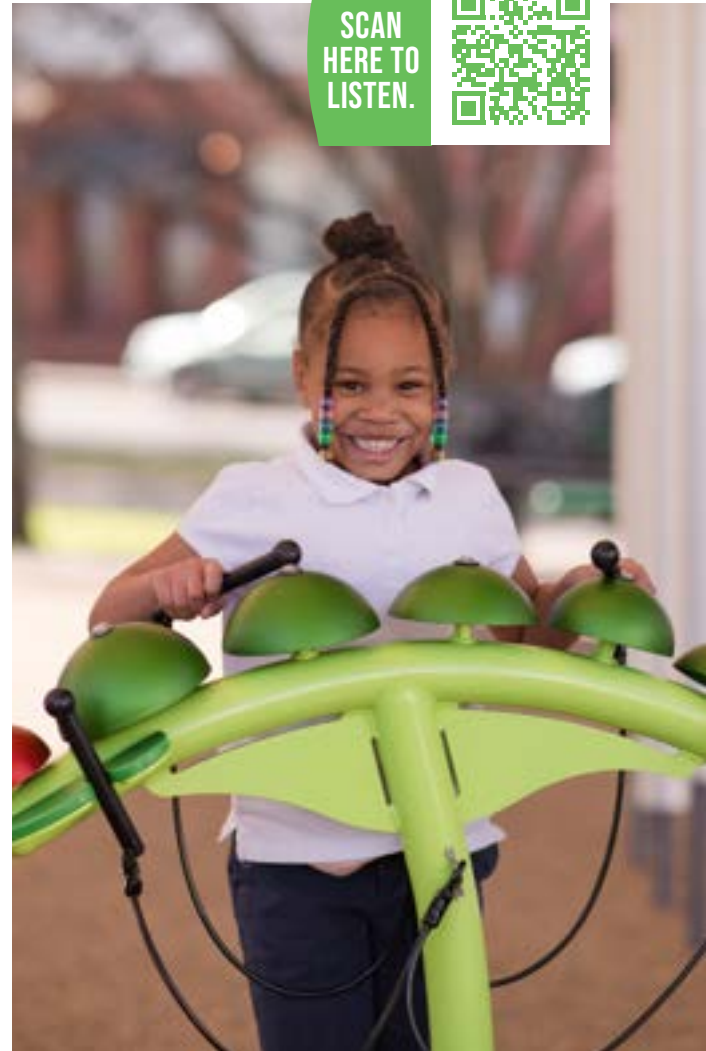

BOTANICAL HARMONY

Inspired by nature (with a touch of whimsy), these playful outdoor instruments will invite people of all ages to explore their inner song. And with no “wrong” notes, it’s easy to discover the harmony between nature and music.

New! CATERPILLAR BELLS

This adorable 7-bell musical instrument is ready to transform any outdoor space into a place of harmonious sound. The Caterpillar pairs beautifully with our Butterflies, Mushrooms, and Flowers, or can stand alone to add a touch of whimsy wherever installed.

BUTTERFLIES (STANDARD)

These botanically inspired Butterflies can be installed as a full collection or added to our musical Flowers collection, where they harmoniously complement each other like, well...butterflies and flowers! Butterflies are sold as a set or may be purchased individually.

BUTTERFLIES FOR TODDLERS

Our Toddler-height Butterflies are intentionally designed to be accessible to the littlest aspiring musicians. These instruments have the same tonal quality and durability as the Standard Butterflies... just smaller!

TENOR TREE (STANDARD)

The 3-sided Tenor Tree brings a musical forest to life. Its green anodized aluminum "leaves" produce bright, sustained tones with 12 notes divided into three chords. Together with its brown "trunk," the Tenor Tree is perfect for creating an enchanted forest of harmony. Three mallets allow 1-3 users to enjoy creating music together.

New! TENOR TREE (TODDLER)

The Toddler Tenor Tree creates a musical wonderland for toddlers! This vibrant tree features three sides filled with colorful, ringing leaves. With just a tap, our smallest musicians can create bright, soothing tones and explore nine harmonious notes. Designed for collaborative play, the Toddler Tenor Tree encourages creativity and musical exploration for 1-3 users.

Standing Ovation
TESTIMONIALS
FOR FREENOTES HARMONY PARK

“YOUR MUSIC PARKS ARE *unique and fun for all ages!* EVERYONE CAN PLAY THE INSTRUMENTS REGARDLESS OF MUSICAL TRAINING.”

– REGINA MARTIN, FORMER PRESIDENT, ROTARY CLUB OF JASPER, GA

“*It was amazing* - UPON THE PARK’S GRAND OPENING, AN IMPROMPTU JAM SESSION WITH ADULTS AND KIDS ALIKE STARTED ALMOST IMMEDIATELY.”

– RICHARD COOKE, GRAMMY AWARD WINNER,
FREENOTES HARMONY PARK FOUNDER

“WE’RE *thrilled* TO SUPPORT THESE INSTALLATIONS THAT BRING PEOPLE TOGETHER.”

– GUY MAIORANO, FOUNDER AND OWNER OF THE ELMS

“INCORPORATING OUTDOOR MUSICAL INSTRUMENTS ALONG THE PATHWAYS OF DORRIAN GREEN ALLOWS VISITORS OF ALL AGES AND ABILITIES TO *interact* WITH EACH OTHER, *socialize*, AND *enjoy* THE SCULPTURAL AESTHETIC OF THESE HARMONICALLY TUNED INSTRUMENTS.”

– TIM SCHMALENBERGER, MKSK LEAD DESIGNER AND PRINCIPAL

DEFINITIONS OF MUSIC TERMS

SOPRANO	<i>The highest pitch range.</i>
ALTO	<i>The second highest pitch range. Lower than Soprano.</i>
TENOR	<i>Third highest pitch range. Lower than Alto.</i>
BASS	<i>The lowest pitch range. Deep sounds lower than tenor.</i>
PENTATONIC SCALE	<i>A major diatonic scale with the 4th and 7th intervals removed. A pentatonic scale can be played in any key. The nature of the scale makes it impossible to make any "wrong notes."</i>
DIATONIC SCALE	<i>A basic 7 note musical scale, which can be played in any key. The first note of the scale determines the key. The white keys on a piano are arranged in the C major scale.</i>
BELL	<i>A type of metallophone, typically consisting of a hollow cavity; some bells known as bell plates are completely flat.</i>
CHIME	<i>A type of metallophone that consists of metal tubes; typically producing bright, ringing sounds.</i>
DRUM	<i>A percussion instrument consisting of a membrane mounted upon/ stretched over a frame. A drum can be struck with either hands or mallets. Drums often produce a range of indefinite pitches that compliment other pitched instruments.</i>
MARIMBA	<i>A pitched percussion musical instrument consisting of wooden bars or other materials of a similar nature. Marimbas often have resonators located underneath the bars which harvest and amplify sound waves.</i>
METALLOPHONE	<i>A percussion musical instrument consisting of metal objects such as bars, tubes, or plates.</i>

SOUND & PITCH RANGES

Choose instruments from each style to enrich the sound quality of your music park.

STYLE	NAME	PAGE	RANGE	RESONATED
Bell	Caterpillar Bells	16	Alto	No
Bell	Butterflies	18/19	Alto / Soprano	No
Bell	Flowers	20/21	Alto / Soprano	No
Bell	Cascade Bells	28	Alto / Soprano	No
Bell	Pagoda Bells	29	Alto / Soprano	No
Bell	Tenor Tree (and Toddler)	24	Tenor	No
Bell	Spring Garden Panel	26	Alto	No
Bell	Mushrooms	17	Bass	No
Chime	Harp	32	Alto / Soprano	No
Chime	Griffin	33	Alto / Soprano	Yes
Chime	Contrabass Chimes	31	Bass	No
Chime	Manta Ray	34	Alto / Soprano	No
Chime	Titan Tines	30	Bass	No
Chime	Swirl	35	Alto / Soprano	Yes
Chime	Serenade	36	Alto / Soprano	Yes
Crotale	Melody Bee	22	Alto	No
Crotale	Lily pad Cymbals	25	Alto / Soprano	No
Drum	Bossa Nova Drums	38	Bass / Alto / Soprano	Yes
Drum	Tuned Drums	40	Bass / Alto / Soprano	Yes
Drum	Calypso	39	Alto / Soprano	Yes
Marimba	Cadence	41	Bass / Alto	Yes
Marimba	Piper	44	Alto / Soprano	Yes
Marimba	Imbarimba	48	Alto / Soprano	Yes
Marimba	Rhythm	43	Alto / Soprano	Yes
Metallophone / Marimba	Duet	46	Alto / Soprano	Yes
Metallophone	Harmony Hive	23	Alto / Soprano	No
Metallophone	Yantzee	47	Bass	Yes
Metallophone	Merry	45	Alto / Soprano	Yes
Metallophone	Aria	50	Alto / Soprano	No
Metallophone	Melody	42	Alto / Soprano	Yes
Metallophone	Pegasus	49	Alto / Soprano	Yes

MALLET VARIATIONS

All mallets are designed to enhance the playability and sound for optimum delight. Pairing instruments with a specific hardness (durometer) of each mallet ensures the richest tone potential. Inclusive Mallets are sold separately upon request.

GREY | 90 DUROMETER

BLUE | 70 DUROMETER

BLACK | 80 DUROMETER

GREY | 70 DUROMETER
CONTRABASS CHIMES

BLACK | 50 DUROMETER
WEE MALLET

BLACK | 80 DUROMETER
HYBRID MALLET

 ASK YOUR MUSIC CONSULTANT ABOUT OUR INCLUSIVE MALLET

MALLETS AND CABLE

The unibody system of the mallets and their thicker cables are very durable, yet easily replaceable if necessary.

Register your installation on our website and receive a FREE set of Mallets!

MALLETT HOLDER

Add-on Mallet Holders keep your mallets close at hand and off the ground. The Mallet Holder can be mounted to any square recycled or steel post and is sold in sets of two, three, or four. Mounting hardware is included.

DESCRIPTION	PART NUMBER
Mallet Holder (Double)	MLT-HOLD-ASSM-2
Mallet Holder (Triple)	MLT-HOLD-ASSM-3
Mallet Holder (Quadruple)	MLT-HOLD-ASSM-4

WARRANTY

Freenotes Harmony Park provides a limited warranty on outdoor musical instruments. These warranties cover damage due to failure or corrosion of metal parts that cause the product to become unfit for intended use. The warranty covers the life of the product as defined below and covers the product under normal use with proper maintenance at the original installation location. Instruments warranty will be voided if not installed in accordance with manufacturer's specifications.

LIMITED LIFETIME WARRANTY

on metal upright posts used in supporting structure of frames and uprights against structural failure or corrosion of metal parts that cause the product to become structurally unfit for its intended use.

LIMITED 5-YEAR WARRANTY

HDPE components such as recycled plastic posts or instrument framework are covered under normal applications against splintering, decay, or fading that causes the product to become inadequate.

Aluminum parts like bars, resonators, and chimes are covered if there is a deficiency that causes the product to become structurally unfit for the intended use or affects the tonal quality of the instrument. Powder-coated steel components such as steel posts and frames, are protected against damage due to failure or corrosion of metal parts that cause the product to become structurally unfit for the intended use.

Bar, chime, or cymbals are covered if failure due to breaking, shearing, and/or rust causes the product to become unfit for its intended use or affects the tonal quality of the instrument.

OUTDOOR MUSIC: SIZED FOR *Everyone*

Any Freenotes instruments with recycled posts can be installed at different heights, depending on the anticipated users. Special surfacing is not required. If a facility is accommodating preschoolers, installations at lower heights are more appropriate, while public parks might prefer that instruments be installed at standard heights to serve a wider audience of users.

PACKAGING AND INSTALLATION

OUT OF THE BOX AND *ready to play*

Freenotes state of the art packaging features custom cut foam inserts that keep instruments snug and secure during shipment. Because most products are pre-assembled in the factory, the actual installation of the instruments are quite easy. Most customers are anxious to play the instruments upon receipt of shipments, so simple to follow instructions are designed to make assembly quick and easy.

FREENOTES HARMONY PARK PRODUCTS ARE EASY TO SPECIFY...

MATERIAL SPECIFICATIONS

ALUMINUM BARS, CHIMES, AND RESONATORS

All aluminum used on Freenotes instruments is custom extruded here in the USA. We use aluminum on areas of the instrument where capturing the tone is key. The aluminum is also anodized with an acid etched finish. While paints and plating sit on top of the surface of the aluminum, anodizing converts the outer layer of aluminum to aluminum oxide, so the coating is fully integrated with the aluminum substrate. Therefore, anodizing doesn't chip or flake like paint – it is completely integral with the underlying metal.

FIBERGLASS BARS

To meet the long-lasting expectations of every one of our instruments we use reinforced fiberglass in lieu of wood on our xylophones. Our fiberglass bars are composed of a vinylester resin mix that contains a UV inhibitor additive, a synthetic surfacing veil, and a 60% glass content, consisting of continuous filament mat and roving. These fiberglass bars provide a higher corrosion resistance for a longer life of play. Unlike wooden bars, our fiberglass bars will not rot or attract insects.

PLASTIC (HDPE) COMPONENTS

Many of Freenotes instruments are constructed and built around HDPE (High-density polyethylene) frames. Our HDPE components are easily cleaned, graffiti resistant, scratch resistant, and will never swell or rot. They are also UV stabilized, so there is no need to ever paint after years of installation.

STRUCTURAL RECYCLED PLASTIC LUMBER

Recycled Posts are available as an option on many Freenotes Harmony Park instruments. Unlike wood, these posts will not splinter, rot, or degrade and are low-maintenance. This environmentally-friendly product is manufactured using recycled high-density polyethylene (HDPE) material that can also be recycled, and requires no painting or staining.

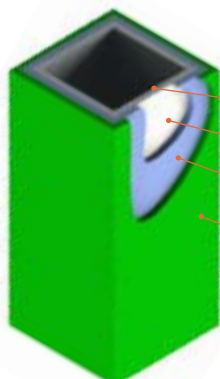

STAINLESS STEEL FASTENERS AND COMPONENTS

All fasteners used on our instruments are made of stainless steel. Stainless steel offers high strength and corrosion resistance properties, as well as a long-lasting flawless finish. You will also find stainless steel is used on our holsters that mount many of our instruments to their posts. This provides a rigid platform for a long-lasting installation. Both our lacing and mallet cables use internally woven stainless steel wires giving the flexibility needed for free movement playing experience as well as enhanced durability.

POWDER COATED STEEL COMPONENTS

All Freenotes Harmony Parks steel posts and frames include a 3-step powder coat finish, which eliminates worry of corrosion and fading even in the harshest of environments.

Original Raw Steel

STEP 1: Sand blasted to nearly white finish to remove any imperfections

STEP 2: Application of 3 mls of Zinc-rich primer TGIC Epoxy Powder Coat

FINAL STEP: Application of 3 mls of super durable TGIC Powder Coat

Introducing

sonicarchitecture

Freenotes Harmony Park proudly presents Sonic Architecture,
our premium line of outdoor percussive sculptures – where art
meets sound and resonates with every touch.

Music serves as a timeless and cross-cultural means of connection, uniting people across generations and cultural backgrounds. Through the integration of Sonic Architecture's sound sculptures in outdoor public areas, we facilitate a rhythmic exchange between art, nature, and the human experience.

For more than 40 years, artist/musician team Bill and Mary Buchen have designed public art installations and interactive sound sculptures. Their works are featured in parks, schools, science centers, transit stations, children's museums and playgrounds around the world.

Elegantly stylized and developed through years of performance and study, these beautiful sound sculptures are designed to reflect the richness and depth of the world's percussive traditions.

The sound sculptures of Sonic Architecture are handcrafted from durable stainless steel and built to withstand harsh environments and last for a lifetime of play.
